The above values are averages. Rice is a natural product and its quality therefore depends on a variety of factors. Soil composition, fertilization, climatic conditions, etc. have a direct influence on the quality of the product. It is therefore possible that individual values may sometimes be higher or lower than those indicated above. This product complies with Swiss food law in all respects.

### AVERAGE MICROBIOLOGICAL VALUES IN CFU/G

Rice corresponds to the Swiss and European food law.

The microbiological values can, at your request, be determined by a specialist laboratory. On account of the homogeneity of the laboratory samples, major divergences are unavoidable.

Any values determined therefore cannot always be guaranteed.

### MANUFACTURING PROCESS

In the country of origin:

The lengthy experience of the rice farmers in the USA and of our Calrose suppliers guarantee meticulous cultivation methods and well-balanced processing. After harvesting in September/October, Calrose rice is dried and de-husked. We import the product as semi-raw rice or as white rice and subject it to rigorous quality controls.

Processing in Switzerland by Reismühle Brunnen:

Cleaning, removal of immature kernels, milling, sorting by size, electronic colour-sorting, sifting/sieving, packaging
